Professional Summary

Detail-oriented web developer with full-stack skills in HTML5, CSS3, JavaScript, PHP, and MySQL. Experienced in building CRUD apps, integrating APIs, and deploying live projects using GitHub and Netlify.

Technical Skills

Languages: C, C++, Java, JavaScript, PHP, Python

Web Technologies: HTML5, CSS3, Bootstrap5, React.js

Database: MySQL

Tools: VS Code, notepad

Version Control: Git, GitHub

Testing: Unit Testing (basic)

Deployment Tools: GitHub Pages, Netlify, replit

Soft Skills: Problem-Solving, Communication, Quick Learner, Team Collaboration

Education

2023 Master of Computer Applications (M.C.A) **92.4**%

Institute of Management Studies and Information Technology (DBAMU), Chhatrapati Sambhajinagar, Maharashtra

2021 Bachelor of Science in Computer Science (B.Sc. CS) **82.77**%

Vivekanand Arts Sardar Dalipsingh Commerce and Science College, Chhatrapati Sambhajinagar, Maharashtra

2018 H.S.C. (Science) **60.77**%

Vivekanand Arts Sardar Dalipsingh Commerce and Science College, Chhatrapati Sambhajinagar, Maharashtra

2016 S.S.C. **87.40**%

Bal Dnyan Mandir School, Chhatrapati Sambhajinagar, Maharashtra

Professional Experience

Web Developer Intern – Txon | July 2022 – Jan 2023 | Remote

- Developed and deployed 4+ responsive and interactive web applications using HTML5, CSS3, JavaScript, and React.js.

- Key Achievements:

  - Increased project efficiency by 20% through optimized code practices.

  - Implemented API integration in the Weather App, improving functionality by 30%.

- Projects:

  - Calculator – https://jandevaishnavi.github.io/txoncalvj/

  - To-Do List App – https://jandevaishnavi.github.io/todolistvj/

  - Portfolio Website – https://jandevaishnavi.github.io/myportfoliovj/

  - Weather App (React.js) – https://jandevaishnavi.github.io/ssvj/

Project

Blood Donor Management System Work as Web Developer (Frontend & Backend)

Role: Web Developer (Frontend & Backend)

Technology: HTML5, CSS3, JavaScript, PHP, MySQL

Team Size: Individual

Developed and maintained a dynamic web-based Blood Donor Management System.

Handled both frontend and backend architecture independently.

Built the system to manage blood donor data, process donor registrations, and handle blood unit requests.

Enabled users to search for donors based on specific blood groups.

Successfully tracked and managed records of over 500 blood donors.

Technologies used: HTML5, CSS3, JavaScript, PHP, and MySQL.

Entire project development and implementation completed independently.

- Key Achievements:

  - Automated donor matching system, reducing manual workload by 40%.

  - Enhanced data security and integrity in CRUD operations.

Certifications

- 500 difficulty rating – CodeChef

- HTML5 The Language – Infosys Springboard

- CSS3 – Infosys Springboard

- JavaScript – Infosys Springboard

- ReactJs – Infosys Springboard

- Basics of Python – Infosys Springboard

- PHP and MySQL Training – Infosys Springboard

- Java – code360 by coding ninjas

- Python – code360 by coding ninjas

Languages Known

Marathi, Hindi, English

Professional Strengths

- Excellent problem-solving abilities

- Strong communication skills

- Quick learner with a keen interest in new technologies

- Adaptable and efficient in team environments
